Top 10 passages for Question No.2 (Flow Chart) :

1.	Education and Technology	Unit-1, Lesson-2
2.	Civic Engagement	Unit-1, Lesson-4
3.	Folk Music	Unit-2, Lesson-2
4.	The Legend of Gazi	Unit-3, Lesson-3
5.	What is a dream?	Unit-6, Lesson-1
6.	Scaling a mountain Peak	Unit-7, Lesson-2
7.	Family Relationship	Unit-8, Lesson-1
8.	The Storm and Stress at Adolescence.....	Unit-9, Lesson-1
9.	Adolescence and Some.....	Unit-9, Lesson-2
10.	Consumerism	Unit-10, Lesson-5

❖ 1. Education and Technology

1. Artificial intelligence has the potential to revolutionise the way we learn and teach. As a tool in the classroom, AI can provide students with personalised learning experiences, automate repetitive tasks and provide instant feedback. However, it also has its limitations. Let us explore the pros and cons of AI as a tool in the classroom, address the concern that AI could be a threat to teachers' and instructors' jobs and discuss the role of edtech companies in advancing this AI use case.

Advantages of AI in the Classroom

One of the main advantages I see of AI in the classroom is personalised learning. AI-powered educational tools can analyse data on student performance and provide tailored support to improve their grades.

AI can also provide instant feedback. For example, AI-powered educational tools can provide students with immediate feedback on their work, allowing them to identify and correct mistakes quickly.

Another advantage of AI is its ability to automate repetitive tasks. It can grade assignments and quizzes, which can free up teachers' time for other tasks, such as lesson planning and providing more one-on-one attention to students.

1. Based on your reading of the passage, make short notes in each of the boxes in the flow chart **showing the benefits of AI for students.** (No.1 is done for you).

2. Civic Engagement

In civic engagement, issues of public concern are crucial. Civic engagement includes individual or group activities to protect public interests and change the way the community values itself. For example, if you are protesting against any unjust decision of the local municipality such as raising taxes or an act that might work against people's interests, you are civically engaged and your action is considered a civic engagement. This protest can be done in different ways such as organizing rallies, collecting signatures, making human chains, writing petitions, etc. You can also help control traffic in front of a school, help children to cross the roads, work in a team to clean a park or a sea beach, You can also give some services to elderly people. These are all examples of civic engagement as what you do directly affects the community.

6. Based on your reading of the passage, make short notes in each of the boxes in the flow-chart **showing the activities of civic engagement.** (No.1 has been done for you)

3. Folk Music....

Folk music consists of songs and music of a community that are uninfluenced by any sophisticated musical rules or any standard music styles. Bangladesh has a heritage of rich folk music which both religious and secular songs. Folk music may be described as that type of ancient music which springs from the heart of a community, based on their natural style of classical music and modern popular songs.

Folk music has the following characteristics: (i) It is composed by rural folk on the basis of ancient rules transmitted orally; (ii) These ancient rules of music have not been influenced by classical or modern music; (iii) Folk songs may be sung in groups or individually; (iv) No regular practice is required for folk music; (v) It is composed and performed by illiterate or semiliterate people; (vi) It is a spontaneous expression in easy language, local dialect, and simple tune; (vii) Both words and tune are appealing; (viii) despite its universal appeal it uses local dialect; (ix) It depends upon nature and the rural environment; (x) It is an explicit manifestation

of the joys and sorrows of daily life; (xi) It uses simple and natural rhythms; (xii) It contains a strong emotive expression of human love and separation.

2. Flow chart showing the characteristics of folk music :-

❖ 4. The Legend of Gazi

According to some myths and legends, Gazi pir was a Muslim saint who is said to have spread islam in the parts of Bengal close to the Sunderbans. He was credited with many miracles. For example, he could supposedly calm dangerous animals and make them docile. He is usually depicted in peats or scroll paintings riding a fierce looking Bengal tiger, a snake in his hand, but in no apparent danger. According to some stories, he also fought crocodiles who threatened the people of a region full of canals and creeks, indeed, a kind of watery jungle bordering the Bay of

Bengal. Because of his alert and vigilant presence, all predatory animals were said to have been kept within bounds. It was also believed that he enabled villagers to live close to forests and jungles and cultivate their lands. Consequently, people of these religions would pray to him for protection. The story of Gazi pir has been preserved in folk literature as well as art and has been performed in indigenous theatre. In fact, some Gazir Paat scrolls are part of the collection of the British Museum.

6. Make a flow chart **showing the specialities of Gazi Pir :**

5. What is a dream....

Dreams have fascinated philosophers for thousands of years, but only recently have dreams been subjected to empirical research and scientific study. Chances are that you've often found yourself puzzling over the content of a dream, or perhaps you've wondered why you dream at all.

First, let's start by answering a basic question : What is a dream? A dream can include any of the images, thoughts and emotions that are experienced during sleep. Dreams can be extraordinarily vivid or very vague; filled with joyful emotions or frightening images; focused and understandable or unclear and confusing.

Why do we dream? What purpose do dreams serve? While many theories have been proposed, no consensus has emerged. Considering the time we spend in a dreaming state, the fact that researchers do not yet understand the purpose of dreams may seem baffling. However, it is important to consider that science is still unraveling the exact purpose and function of sleep itself. Some researchers suggest that dreams serve no real purpose, while others believe that dreaming is essential to mental, emotional and physical well-being.

Next, let's learn more about some of the most prominent dream theories.

Consistent with the psychoanalytic perspective, Sigmund Freud's theory of dreams suggests that dreams are a representation of unconscious desires, thoughts and motivations. According to Freud, people are driven by aggressive and sexual instincts that are repressed from conscious awareness. While these thoughts are not consciously expressed, they find their way into our awareness via dreams. In his famous book "The Interpretation of Dreams". Freud wrote that dreams are '.... disguised fulfillments of repressed wishes.

Freud's theory contributed to the popularity of dream interpretation. Following his paths many theorists came up with their own ideas about dreams.

3. Read the following text and make a flow chart showing different characteristics of dreams.

6. Scaling a Mountain Peak

Nishat Mazumder, a Bangladeshi woman in her early forties, is a sports icon. She comes of a modest background; her father is a businessman and her mother is a housewife. She is the second of four siblings. She is not very tall or well built, or does not have a charming princess look; but this apparently ordinary girl has three things that she can be proud of. These are: she has extraordinarily supportive parents who accepted her dreams as real; her father was a freedom fighter in the Liberation war of Bangladesh in 1971, and she scaled the highest peak in the world as the first Bangladeshi girl in 2012. Nishat's life presents an inspirational story that the youth in Bangladesh needs to know. Nishat was born on 5 January 1981 in a village called Teori, which is situated in Ramganj upazila in Lakshmipur District. She completed her schooling from Bottomley Home Girls' High School in 1997, and passed HSC from Shahid Anwar Girls' College in 1999.

She earned her bachelor's and master's degree in Accounting from Dhaka City College and currently works for Dhaka WASA as an accountant. She is also interested in different languages and cultures of the world, and has enrolled for her MA in Japan Studies at Dhaka University. For us, Nishat's life comes across as especially significant because it tells us how the influence of one person can motivate someone to dream big. As a daughter of a freedom fighter, Nishat had to face many obstacles in her life, but her mother, her role model, gave her courage and determination to overcome them and pursue her dreams. Ashura Mazumder, Nishat's mother, is

a hardworking and understanding woman, who has been a pillar of support for her family in the direst of situations. Nishat learned from her mother how to keep mental strength in calamitous moments of life. Learning from her, Nishat began her dream of conquering mountains.

6. Read the following text and make a flow chart showing the life events of Nishat Mozumdar.

❖ 7. Family Relationship

The famous Greek philosopher Aristotle said, 'Man is by nature a social animal.' What he meant was that man, by instinct, seeks company of others and establishes relationships, much like most animals of the wild, for companionship and for physical and emotional support. Unlike the animals however, man's relationships give meaning to his existence and inspires him to do well in education, in workplace or in a profession that he pursues.

Relationships are of different kinds. Some are familial and intimate, formed by blood and by marriage; some are social like the ones we have with friends and some are made in school where we form close bonds with classmates and teachers. Relationships can also be fostered in workplace, which may quickly change from professional to social. There are relationships also between human beings and animals, between children and their toys that they cannot part with.

All these relationships keep us close to each other and provide us all kinds of support, love and affection. A person who has no family feels the pain of loneliness and isolation. There is no one to laugh or cry with him/her. When we share our joy with someone, it simply redoubles, and when we suffer a loss and someone shares our sorrow, it lessens. Relationships are thus needed for our emotional health.

To build relationships, we need to have trust and respect for each other, and love where this is needed. We cannot be selfish and possessive if we want to establish an effective relationship. But quite often we see people quarrelling and fighting with each other which only brings misery and loss to all.

7. Make a flow chart showing the types of relationships are and what they do to us :

❖ 8. The storm and.....

The time of adolescence is a period of preparation for adulthood during which one experiences several key developments. Besides physical and sexual maturation, these experiences include movement toward social and economic independence, development of identity the acquisition of skills needed to carry out adult relationships and roles and the capacity for abstract reasoning. While adolescence is a time of tremendous growth and potential, it is also a time of considerable risks during which social contexts exert powerful influences. Many adolescents face pressure to use alcohol, cigarettes, or other drugs and to initiate sexual relationships putting themselves at high risk for intentional and unintentional injuries, unintended pregnancies, and sexually transmitted infections (STIs), including the human immuno deficiency virus (HIV). Many also experience a wide range of adjustment and mental health problems.

4.Make a flow chart showing the major characteristics/ key developments of adolescence :

6.A time of experiencing adjustment and mental health problems

(মানিয়ে নেয়া এবং মানসিক স্বাস্থ্য সমস্যার সম্মুখীন হওয়ার সময়)

❖ 9. Adolescence and some.....

In Bangladesh, the legal age of marriage is 18 for girls and 21 for boys. However, 33 Percent of adolescent girls are married before the age of 15 and 60 become mothers by the age of 19. Research finds that adolescents with higher level of education and from more affluent families tend to marry at a later age. Boys, however, become ready for marriage only after several years of adolescence and young adulthood.

When a girl gets married; she usually drops out of school and begins full time work in her in laws' household. In the in-laws' house, She becomes vulnerable to all forms of abuse, including dowry -related violence. In Bangladesh, it is still common for a bride's family to pay dowry, despite the practice being illegal. Dowry demands can also continue after the wedding. For an adolescent bride, even if her in-laws are supportive, there are greater health risks in terms of pregnancy and childbirth. The majority of adolescent brides and their families are uninformed or insufficiently informed about reproductive health and contraception. The maternal mortality rate for adolescents is double the national rate.

When adolescent girls are pulled out of school, either for marriage or work, they often lose their mobility, their friends and social status. The lack of mobility among adolescent girls also curtails their economic and non-formal educational opportunities. Moreover, they lack information about health issues. According to a study, only about three in five adolescents have even heard of HIV. It is also reported that more than 50 percent of adolescent girls are undernourished and suffer from anemia. Adolescent fertility is also high in Bangladesh. The contribution of the adolescent fertility rate to the total fertility rate increased from 20.3% in 1993 to 24.4% in 2007. Moreover, neonatal mortality is another concern for younger mothers

5.Make a flow chart showing the situation of adolescent girls in Bangladesh :

10. Consumerism

Spending may make us happy or unhappy depending on how and why we spend. When we spend money on things that we need and within our limit, it is good. When it becomes a compulsive behaviour, it makes life stressful. Unnecessary spending or spending beyond one's means has some bad effects. For one thing, it may lead to financial ruin or debt and for another, it may create unhappiness within families. People who overspend are never satisfied with what they have. They always rush for brands, fashion items, designer clothes etc. Over a period of time, it becomes an addiction which may eventually create psychological problems.

2. Read the following text and make a flow chart showing effects of unnecessary spending.

(মানুষকে কখনোই সন্তুষ্ট করা)

5. Becoming an addiction
(আসক্তিতে পরিণত হওয়া)

6. Creating psychological problems.
(মানসিক সমস্যা তৈরি করা।)
